DL Digital Logbooks

CLASS AND
FLAG APPROVED
LOGS ON A SINGLE,
SECURE DIGITAL
PLATFORM

Save time, ensure compliance

Ingenium's easy-to-use, intuitive software enables real-time data sharing to ship-owners or management offices on shore. It's transparent, rich in insights and a key, verifiable way of proving compliance with regulations and charter covenants.

Digital logbooks

The Digital Logbook software is a web-based application installed onboard as a standalone application that is fully usable offline (vessel module). The office module allows for monitoring and administering the log on board.

- Oil Record Book Part I (ORB)
- Oil Record Book Part II, (ORB Part I, II)
- Cargo Record Book (CRB)
- Ballast Water Record Book (BRB)
- Garbage Record Book (GRB)
- Annex VI Log
- Deck and Engine Log

*All logs are modular and customised to vessel configurations.
Any combination of logs can be activated based on the subscription.*

Accurate and error-free data

- All our logs are class and flag approved
- Compliant to MEPC 312 (74) and IMO Guidelines
- Electronic signature compliant with EIDAS Regulations Standards
- Enables error-free oil record book entries
- Real-time view in the office
- Secure and tamper-proof
- Stored and signed digitally
- Auditable remotely
- Build analyses based on log entries
- Default entries and values - reduce wrong interpretations
- No logistics or shipping costs
