Extended Port Database

Providing you with the most comprehensive port directory

NAVTOR's Port Data module in NavStation gives you the latest ports and terminals information and the most cost-effective, accurate and comprehensive port data available. The extended port database is provided by IHS Markit, the world's largest maritime database, with an information-gathering heritage spanning over 250 years, including extensive information on all vessels of 100 GT and above.

Quality Data & Sources

IHS Markit is the SOLE originating source for assigning the IMO Ship and company numbers, guaranteeing an unmatched accuracy and coverage for vessel characteristics and the global newbuilding order book. The extensive port database coupled with excellent relationships with port and maritime representatives are the foundation for IHS Markit to provide you with the most comprehensive port directory.
