

Premium Anchor Rope

Premium anchor rope - ready made with encapsulated lead core

This ready made anchor line with encapsulated lead is made from recycled polyester and helps sailors to anchor their sailingboats safely under almost any conditions. The lead is added to one third of the rope, which helps your anchor to stay on the ground. The rope was developed for easy handling on the bow and stretches enough to handle the forces at anchor.

Technical features

The Premiumropes anchor rope is made out of rPET and is strong as well as as abrasion resistant, even in tough conditions. The lines are equipped with encapsulated lead in their core, which will make your anchor bury itself faster, reducing the chance of it dragging or scratching against the seabed. Our ropes are designed to stretch enough to handle the forces when you are at anchor, whether it's calm or choppy waters.

What makes the premium anchor rope eco-conscious?

The premiumropes anchor lines are made from recycled polyester , rPET is created by recycling plastics that were previously used as packaging materials, e.g. plastic bottles, which helps to decrease the amount of plastic waste in our oceans.

The lead core is encapsulated and prevents water contact, which protects the surrounding ecosystem.

SPECIFICATIONS

TYP	Length in m	daN (~ kg)	Weight in kg	Boatsize
10 mm	25	1300	3,7	up to 8m
12 mm	30	1900	5,1	up to 11m
14 mm	40	2800	8,2	up to 15m
16 mm	40	3700	10,0	up to 18m

MORE INFORMATION

Function	Mooring - Anchoring
Segment	Motor Yacht, Classic Yacht, Sailing Yacht, Cruising Yacht
Construction	Double Braid
Cover	rPET
Core	rPET
Diameter	10 mm, 12 mm, 14 mm, 16 mm
