

Product

Lighting

We are continuously searching the lighting solution based on our cumulated experience and understanding for the lightings. As a result, we can provide the top-notch lighting solution including lighting architecture, lighting, controllers, switches, and plugs to our valuable customers from all industrial fields. For an optimized lighting solution, we are always considering both economic and technical aspects with strict quality control program which is certified for international standards.

NEW

Lighting Technology

We are endeavoring to lead the lightings industry through the sustained R&D effort in developing up to date lighting technologies. Based on our recent effort on the application of LED as a new lighting source in 2012, the world first full LED lighting ship was built with our LED lights. We, surely, can supply all sort of LED lights which could be replacements of traditional lighting including special lighting to meet customers' inquiry.

Explosion Proof LED Ceiling Light
