

INTEGRATED WIRELESS SYSTEM

IWS (Integrated Wireless System) is to enable Wi-Fi everywhere on the ship, and through this, integrated IP base equipment to enable monitoring.

Since the cable connection to the access point, which is a Wi-Fi devices, is not a LAN cable, but a Twist cable for ships, it is possible to reduce the cost and install it on a ship in operation.

A true smart ship in analyzing and monitoring everything in real time.

DESIGNATIONS

VARIOUS APPLICATION FIELDS

	APPLICATION
Smartphone	SMARTPHONE APPLICATION IN THE SHIP (DAEYANG TALK)
	PHONE CALLS BETWEEN AUTO TELEPHONES ON SMARTPHONE
Tablet PC	VR (VIRTUAL REALITY) & AR (AUGMENTED REALITY) OTHER THAN ALARM MONITORING
	INTERWORKING WITH VARIOUS NAVIGATION EQUIPMENT
